Work Experience

AuxCode (FullStack Developer)   07.2024 - 01.2025

- Led frontend modernization of AuxTA logistics platform, migrating 50+ legacy components to PrimeVue with dark theme integration
- Developed PrimeNG demo site (15+ interactive components) in 3 weeks, showcasing rapid framework adoption
- Conducted comprehensive manual testing for enterprise IoT project, identifying and resolving 40+ bugs

GlobalOne Ltd. (C#/MVVM Project Lead)   10.2023 - 01.2024

- Designed and delivered marine certification management system processing 10,000+ annual records with 99.9% data integrity
- Implemented Agile workflows that achieved 100% deadline compliance, earning "flawless execution" feedback from maritime regulators and project manager

PROJECTS

- **Learn&Earn | Team-Built Gamified Education Platform**
  Co-developed a React/Node.js learning ecosystem with in-platform EduCent currency, partnering with 10+ local businesses to convert study achievements into real discounts, featuring Python-based AI-generated tests and focus timers that improved user retention by 67%

- **Property Management System**
  Java backend with Hibernate/JPA managing building/apartment data. Designed relational database with entity relationships and business logic with SqlWorkbench

- **Multithreaded Store Simulator**
  Java application handling 10+ concurrent transactions across 4 threads implementing synchronization to prevent race conditions with real-time inventory management system

EXTRACURRICULAR ACTIVITIES

- **Student Leadership**
  - Active Student Council member organizing university initiatives, member of the C.O.D.E Club

- **Hackathons and more**
  - Honored as a top finalist at the Digihack Hackathon
  - Completed SoftUni Programming Basics(6.00), currently enrolled in Udemy Web Development Bootcamp and Harvard's CS50
  - Regular participant in online coding challenges and competitions
